Data readiness checklist

AppiLabs

Tick each statement that is true for your business. Fewer than 10 ticks usually means dashboards or automation will struggle until the foundations are fixed.

Sources

- ☐ We know every system that holds customer, sales and operations data
- ☐ Each source has a named owner
- ☐ We can export data from each system without manual copying

Quality

- ☐ Key fields (dates, IDs, amounts) are filled in consistently
- ☐ Customers and products have one ID across systems
- ☐ Duplicates are found and fixed regularly

Definitions

- ☐ Our top 10 KPIs are written down with formulas
- ☐ Everyone uses the same definition of revenue, customer and churn
- ☐ We agree which system is the source of truth for each metric

Process

- ☐ Reports are produced on a fixed schedule
- ☐ Report preparation takes less than half a day
- ☐ Errors in reports are rare and traced to a cause

People

- ☐ Someone is responsible for data quality
- ☐ Managers can read and question a dashboard
- ☐ The team has basic spreadsheet or BI skills
