# Research proposal planning template

AppiLabs

Answer each prompt in one or two sentences before writing your proposal. Clear answers here make every later chapter easier to write and defend.

## Problem

- [ ] What is happening, where, and who is affected?
- [ ] What evidence shows it matters?
- [ ] What is not yet known about it?

## Aim and objectives

- [ ] One sentence aim that starts with 'To ...'
- [ ] Three or four objectives using verbs like assess, examine, compare
- [ ] One research question per objective

## Literature

- [ ] Three key theories or models you will draw on
- [ ] Five core studies and what each found
- [ ] The gap your study fills

## Method

- [ ] Design (survey, interviews, mixed) and why it fits the questions
- [ ] Population, sample and sampling method
- [ ] Instrument and how you will test it
- [ ] Analysis technique for each objective

## Practicalities

- [ ] Ethics approval and consent process
- [ ] Timeline working back from the deadline
- [ ] Risks to data collection and your backup plan
